

Duora2

Adjustable functions to cater postural changes and differences in body physique.
Highly functional task chair ideal for variety of spatial settings.

Conforms to the following criteria's as set in WELL v2.
 • V02 Part 3 (Provide Chair Adjustability)
 • X02 Part 2 (Manage Lead Paint Hazards)

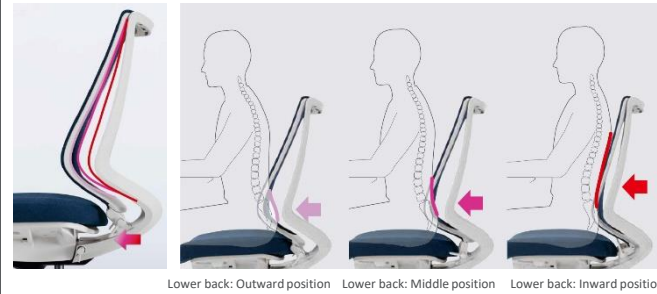

Duora2

Posture support functions to cater differences in work postures

■ 3-stage pelvic adjust support

The lower back can be set inwards to one of 3-positions to provide support to the lower back and holding the pelvis in place to maintain adequate seating posture. Simple lever adjustment to the backward leaning/upright/forward leaning position.

■ Auto-tilt mechanism

The seat surface automatically adjusts to forward/backward leaning postures in accordance to the body movement. This maintains the spinal S-shape curvature even in the forward leaning posture. Further, the Auto-tilt enhances weight dispersion and relieves pressure on the under thighs.

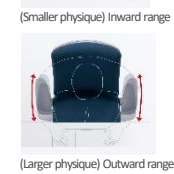

■ 2way motion armrest

2way motion armrest with a wide adjustment range to suit different seating posture from forward leaning /upright / backward leaning postures. Sliding motion to cater difference in body physique and improved operability to be used in the optimal position.

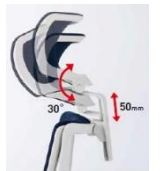

■ Adjustable headrest

Height and angle adjustable headrest to suit different body physique and working postures. Support to the back of the head to reduce pressure strain on the back and neck.

Height range:
50mm / 6-stages
Angle range: 30°

■ Selection

Mesh back

Plastic base (Black)
Headrest
Adjustable arms

Polished base
High back
Aluminum arms

Plastic base (White)
Headrest
Fixed T-arms

Plastic base (White)
