VARIATION

Both casual and light design with comfortable usability.
A simple chair that matches well with a host of work scenes.

FUNCTION

Small castors for smoother maneuverability

Any chair adopts small maneuverable castors in the same color matching the main unit. It accompanies the body's movements and allows for effortless movement.

Easy-to-stand height setting

A stool that can be actively used.

Space saving

Lightweight and easy to place and carry. Any chair is nestable, and stack stool is stackable for efficient storage.

Seat cushion structure

Plano-convex shaped seat with a firmer middle core. The molded urethane foam cushion completes seating comfort and suitable for everyday, high-traffic use.

Poly backrest and Poly back frame with antibacterial agent (Chair only)

99% bacterial reduction after 24 hours compared to the surface not antimicrobial processed. Antimicrobial properties are based on testing in accordance with International Standards ISO22196.

*The antimicrobial performance is limited to the backrest of the chair.
